Tripp Lite Digital Tower Line-Interactive UPS Systems

Reliable Power and Advanced Protection for Computers and Electronics

Featuring a multifunction LCD status screen and a compact tower form factor, Tripp Lite's Digital Tower UPS Systems provide reliable power and advanced protection for a wide range of home and office electronics, including computer systems and audio/video components.

Key Features

- Multifunction LCD screen shows real-time power data, including input/output voltage, input/output frequency, battery charge level, battery voltage, estimated runtime remaining, connected equipment load level, connected equipment wattage and protection status

- Load capacity up to 1500 VA can support a small office or home theater setup

- Automatic Voltage Regulation (AVR) protects equipment by adjusting abnormal voltages to safe levels

- Reliable battery backup supports a desktop computer for up to 90 minutes during power failures (75 W load)

- Surge protection and EMI/RFI noise filtering prevent equipment damage and malfunctions

- Tel/Ethernet (RJ45) jacks protect telephone, fax, modem, DSL or network connections

- Coaxial jacks protect cable, satellite or DVR connections

- HID-compliant USB port and free PowerAlert data-saving software enable unattended system shutdown and file saves during extended outages

- 3-year limited warranty
