

NEW SOLUTION ANNOUNCEMENT

PowerAlert® Device Manager Upgrade v20.0

Powering and Connecting Your World

A New Foundation for Network Device Management

What is PowerAlert Device Manager (PADM) version 20.0?

PADM v20.0 is the new upgrade to the firmware behind the WEBCARDLX, Tripp Lite’s HTML5-based web management accessory card for select UPS systems and PDUs. With the WEBCARDLX, you can remotely monitor, control and reboot equipment via web browser, network management software or command line interface.

WEBCARDLX

Why upgrade?

PADM v20.0 provides a completely new and improved user experience.

- New features
- Better performance
- More intuitive, user-friendly interface

The upgrade will be available as a **free** download from tripplite.com.

New Features

- Customisable, interactive dashboard
- Time-based data log
- User roles and privileges
- SMS notification
- External battery pack configuration
- Ability to check for new firmware updates
- Device backup and restore
- Ability to import SSL certificates
- Support for LDAP (in addition to RADIUS)
- Multi-language support*
- Customised events*

* Future release.

What about PowerAlert software?

Tripp Lite will introduce the PowerAlert Element Manager application to consolidate existing software solutions. The result will be a common PowerAlert user experience for managing Tripp Lite devices.
