

# DVI over Cat5/6 Extender, Box-Style Remote Repeater for Video, DVI-I Dual Link, Up to 175 ft. (53 m), TAA

MODEL NUMBER: B140-110

Extend and expand a Tripp Lite B140-Series DVI over Cat5 installation

#### Description

The B140-110 remote repeater unit can be added to your B140-Series HDMI over Cat5 installation to expand the range and number of monitors. It transmits a DVI-D Single-Link signal up to 175 feet (53.3 meters) away using a single Cat5e/6 Ethernet cable. To achieve maximum distance and resolution, use 24 AWG solid wire Cat5e/6 cable (N202-Series). The B140-110 is compatible with all operating systems and is plug and play with no software or drivers required. It features a built-in equalization control for adjustment of the video image. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.

Installation is simple. Just insert the B140-110 repeater into the middle of your installation (cannot be used with passive extender kits or passive receiver units). In the case of a B140-101X active extender kit, the built-in DVI connector on the transmitter is connected to the DVI source. It is then connected via Cat5e/6 cable to the B140-110, which is connected via Cat5e/6 cable to the B140-101X receiver unit. Finally, a monitor is connected to both the repeater and receiver units using P561-Series DVI cable (not included).

- Connect up to four remote units (three repeaters and one active receiver) in a single chain for a total of four displays (an active receiver should be the last unit in a chain).
- A 1920 x 1080 at 60 Hz signal can be extended up to 125 feet (38.1 meters) from each repeater to the next unit in the channel, or a 1024 x 768 at 60 Hz signal can be extended up to 175 feet.
