

Standards that govern use of this product vary by country and sometimes municipality. In the United States, this product is not for use in the Patient Care Vicinity, as defined in the National Electric Code (NEC). This product is approved to CSA C22.2/CuL standards and approved for use in Canada. For application guidance and product selection in your country, please consult a Tripp Lite Healthcare Product Specialist or your own expert.

Safe-IT UL 1363 Medical-Grade Power Strip, 6x Hospital-Grade Outlets, Antimicrobial, 15 ft. (4.57 m) Cord

MODEL NUMBER: PS-615-HG

Delivers power to devices outside of patient care vicinities, including therapy rooms and administrative areas.

Features

6-Outlet Power Strip Supplies Power Outside Patient Care Vicinities This medical-grade power strip is for administrative areas or resident rooms of long-term care facilities that do not use line-operated electrical equipment for diagnostic, treatment or monitoring purposes. This includes operating rooms, therapy rooms, imaging environments and administrative areas. With six NEMA 5-15R-HG outlets and a 15-foot (4.6-meter) power cord with NEMA 5-15P-HG plug, this 120V power strip complies with UL 1363.

Exclusive Antimicrobial Protection Fights Healthcare-Acquired Infections (HAIs)The PS-615-HG is protected by a patented antimicrobial powder coating with EPA-registered and FDA-compliant silver ionic technology. The antimicrobial surface protection is 99.9 percent effective in inhibiting the growth of bacteria and reducing the risk of HAIs in hospitals and other medical environments. The coating meets the requirements of JIS Z 2801:2000, an international standard for evaluating efficacy in antimicrobial products.

Premium Safety Features Help Ensure Proper Power ConnectionsWith no central power switch, the PS-615-HG presents no danger of accidental shutoff and cutting off power to essential devices. One resettable 15-amp circuit breaker shuts down all input if the connected load draws too much power.

Ready for Installation Straight from the BoxBuilt-in mounting flanges and integrated keyhole slots let you install the durable metal housing on any wall or other flat surface for distributing immediate power to equipment outside a patient care vicinity.

Specifications

Highlights
