Features

USB-C Cable Connects Devices for Charging

This USB cable (M/M) is compatible with any device with a USB-C or Thunderbolt 3 port, including MacBook Pros, Chromebooks and Windows laptops. It allows you to connect your notebook computer to a docking station, your Apple or Android device to a wall charger or power bank, or an external hard drive to a PC or tablet, to name just a few valuable uses for the cable.

PD Charging Cable Supports up to 60W for Syncing and Charging Mobile Devices

The Power Delivery cable provides power output up to 20V 3A (60W), which is sufficient for fast charging, syncing and powering most smartphones and other mobile devices. It also supports USB 2.0 data transfer rates up to 480 Mbps. The USB-C to USB-C cable is backward compatible with previous USB generations, allowing you to use it with older equipment.
